

GU210

2x10" stainless steel passive subwoofer

Meet GU210, the compact powerhouse of KGEAR GU family. Comprised of a 10" ferrite magnet woofer and a 10" passive radiator, the GU210 delivers a precise bass response with high power and efficiency.

The GU210 is entirely built with steel, including both the cabinet and the grille. Its robust and durable design makes it well-suited for outdoor installations (IP64 with G-IPCAP1 purchased separately)

Thanks to a frequency response from 40Hz to 250Hz this subwoofer has a deep definition in the bass range and it is the perfect companion of GH4 and GF family.

With a passive low-pass filter on board, the GU210 can be drive without a dedicated preset, for quick and easy installations.

Thanks to various accessory options for wall-mounting, down-firing, and standing configurations, this subwoofer offers versatility for a broad spectrum of applications— from hospitality and corporate settings to residential use.

Redefine your audio experience with easy installation and exceptional reliability, delivering powerful sound without sacrifices.

Technical specifications

Type	Passive subwoofer
Transducer	10" ferrite magnet woofer 10" passive radiator
Frequency Response ¹	40 Hz - 150Hz (-6dB)
Frequency Response ²	40 Hz - 250
Max SPL ³	124 dB Peak
Rated power	400 W (peak)
Coverage	omni
Connectors	1x Phoenix connector (4-pin Euroblock)
Nominal Impedance	4 Ω
IP rating	IP64 (w G-IPCAP1)

Handling & Finishes

Dimensions (WxLxH)	560x 282 x 150 mm (22,8 x 11,1 x 5,9 inches)
Weight	13 kg (28,7 lb)
Material	Stainless Steel
Color	Black / White

¹ With dedicated preset

² Maximum SPL is calculated using a signal with crest factor 4 (12 dB) measured at 8 m then scaled at 1 m
